Other :- • Git • Jira • Postman • VsCode • Azure

Experience

Cognizant Technology Solutions   *Nov 2020-Present*
Associate
Look-Up Tool Enhancement
Designed and developed a dynamic customer data lookup tool tailored for swift resolution of customer account issues by the operations team. Adapted and customized the tool for different teams working across various applications.
Account Merge Tool Development
Collaborated closely with the operations team to comprehend account merge challenges. Streamlined the manual account merge process by analyzing multi-application data. Created a dedicated tool that presents detailed merge account information, along with informed indicators for optimal decision-making. This initiative significantly accelerated incident resolution.
